

SpikeX QUICK START

Spike signals for GainX, PainX, FlipX and FX Vol.

SETUP

- 1 Put `SpikeX.ex5` in `MT5\Experts`. Restart MT5.
- 2 Tools → Options → Expert Advisors → allow WebRequest for <https://syntxfx.com>
- 3 Drag **SpikeX** from Expert Advisors onto your chart.

▲ Solid arrow = trade.

Price is stretched. A spike usually follows. Everything else on the chart just tells you how good that arrow is.

ON THE CHART

▲ Solid arrow	BUY or SELL. Your entry.
△ Hollow arrow + 2 blue lines	Flag. A setup is forming. Arrow inside the lines = strong.
R 3 / S 2	Resistance / support. Number = how many bounces.
● Small blue dot	Pullback. Trend is still on.
▨ Blue / grey cloud	Trend. Blue = up, grey = down.
● Green / red dot	Swing. The big turn (FlipX, FX Vol).

GainX: buys only. PainX: sells only. FlipX and FX Vol: both. Arrows show when the candle closes and never disappear.

PHONE ALERTS

🚀 BUY GainX 1200 | SpikeX | 21:40
▼ SELL PainX 999 | SpikeX | 21:40

Only buy / sell and swing signals push. Max one per symbol every 15 min. The time is when it fired.

Set up: MT5 phone app → MetaQuotes ID → MT5 Tools → Options → Notifications.

GOOD TO KNOW

- SpikeX never trades. You do.
- One EA per chart. Give SpikeX its own.
- New chart? Lines appear after a minute.
- Keep MT5 open (or use a VPS) for alerts.
- **"Service suspended"** = not on the member list, or step 2 missed. Fix, re-add SpikeX, or contact SyntxFX.
